MERIDIAN PRODUCTS

NEWS, PRODUCT UPDATES & CURRENT INDUSTRY TRENDS | **FALL 2024/WINTER 2025**

## SOLID WOOD EDGE BANDING

Experience solid wood edge banding at its finest. This industry staple remains a popular choice with our E208 door. Additionally, our new E300 door, featuring three-piece construction, offers a perfect blend of contemporary and traditional styles, ideal for transitional kitchen designs. Both doors come with a .5MM edge band. For those desiring a more substantial edge, we now offer the E212 design with a robust 2MM edge banding.

Actual wood and finish colors may vary due to printing process. Meridian Products always recommends ordering a sample door and/or drawer sample for accurate color selection and representation.

**SLAB 400 SERIES**

The kitchen and bath market is seeing continuous high demand for the Skinny Shaker design, a modern twist on the classic Shaker style. Traditionally, Shaker cabinets feature stiles and rails with a flat surface of 2-3 inches. Meridian Products has innovatively expanded this concept by creating Skinny Shaker designs with flats as narrow as 1/4 inch. These designs are proving popular among both contemporary and traditional customers.

## EVOLUTION SERIES EXPANDED

As the American market increasingly shifts toward European-style construction, the demand for laminated high-gloss and matte finishes has reached new heights. Keeping pace with this trend, Meridian Products has expanded our offerings within the E210 series, now featuring cutting-edge Synthesis banding technology. This advancement not only enhances the sleek and seamless appearance of our products but also delivers superior durability and performance. We are confident that the E210 series will exceed your expectations and meet the growing demand for premium, European-inspired cabinetry solutions.

## WOOD-GRAINED LAMINATES

Wood-grained laminated products are increasingly in demand, offering the natural elegance of wood with the sleek, clean look of a modern kitchen. This combination is sure to captivate your customers and leave a lasting impression.

Synthesis banding is a heated edge banding that creates an almost nonexistent joint with no glue line.

# TEAM SPOTLIGHT

## GET TO KNOW THE TEAM BEHIND MERIDIAN PRODUCTS

My name is **Steve Gregor IV**, and I've been with Meridian Products since 2019, serving as the quality control leader for the past four years. I'm committed to continuing my work in quality control and look forward to being a part of Meridian's future – I couldn't imagine working for a better company.

My educational journey began in physics education, but I soon transitioned to studying pure physics and engineering. I'm passionate about strategy games and competitions, and I've even had the honor of competing on the world stage in a game I enjoy. While I'm not a frequent sports watcher, I do enjoy playing sports like soccer and ultimate frisbee.

Having a consistent work schedule at Meridian allows me the time to pursue these interests, which I truly appreciate.

One of the things I value most about working at Meridian is the strong sense of camaraderie. The connections I've made here are meaningful, and the company's environment fosters this kind of teamwork. I cherish the memories I've created with my colleagues and look forward to building even more in the years to come.

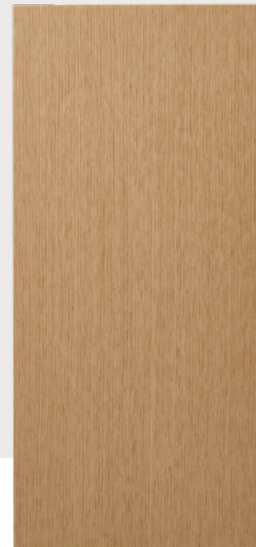

I have a problem solver's mindset, and that's what I love most about my role – solving complex challenges. Whether it's identifying the root cause of a quality issue or finding innovative solutions, I tackle each challenge with persistence and passion. I'm deeply committed to the growth and improvement of Meridian Products, and I'm grateful for the opportunities I've had over the past five years. I'm excited to continue learning about our industry and to contribute to our future as a leader in delivering superior quality products.

### RECON VENEERS

As client demands grow, our new R208 design featuring Recon Veneers is becoming increasingly indispensable. This product offers exceptional consistency throughout an entire project, a feature our clients greatly appreciate. It stains beautifully and is highly successful for customers who desire minimal color and character variation.
