

Meridian Products

Thank you for the opportunity to provide you products and services that we believe will add value to your business. That is an opportunity we take seriously, and we pledge our continued efforts to better ourselves and the work we do on your behalf.

This manual and our website **www.meridianproduct.com** are resources outlining the products we produce and the services we provide. Please take time to familiarize yourself with the information provided. We believe your understanding of this information will enhance our relationship moving forward.

Our products are custom built, based on your order. To experience our best service and a product built to your order specifications, it is important that you provide us clear, complete and correct information. On the occasion that you are unable to locate the product you need within this manual or on our website, contact your Meridian Products Sales Member or Customer Support Representative. We believe in most cases we will be able to accommodate your needs.

If you have other questions or need additional information, your Sales Member and/or Customer Support Representative will be happy to assist you. Their contact information is located within Section 1 of this manual.

We look forward to a long and growing relationship.

Sincerely,

J Michael Hurst

FRAME ONLY WITH 6 LITES 2 X 3

PANEL SETBACK FROM FACE

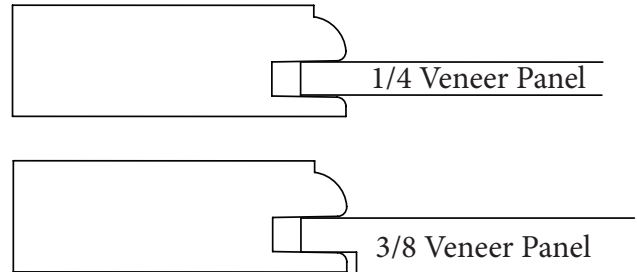

RP OR RAISED PANEL

Solid wood or MDF panel with profile cut on perimeter of panel (panel raise). Panel Raise inserts 5/16" into plow.

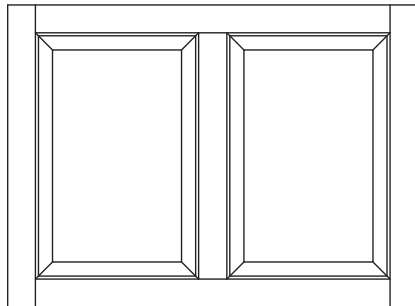

FP OR FLAT PANEL

Non-solid wood panel: veneer face and back with mdf (Meridian Standard) or plywood core. **ADDED COST** per panel on 3/8" panel veneer.

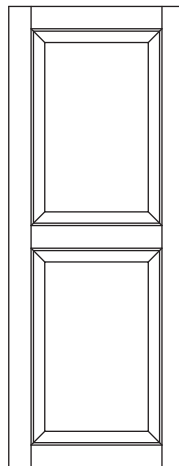

MULTIPLE PANEL OPTIONS

All doors over 26" W or 48" H will be charged 2 design charges unless noted. All doors exceeding these dimensions will be made with multiple panels as standard. Meridian terminology of opening size is from the inside of the bead to inside of the bead. Please do NOT include the bead profile when giving specific panel opening sizes.

2 Panel side by side

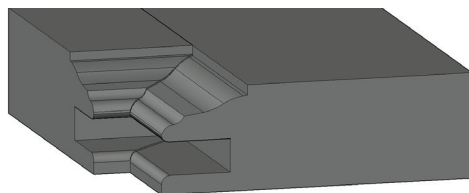

2 Panel upright

OFFSET FRAME PROFILES

The following bead profiles are produced with an intentional .010th variance between the stile profile and rails profile. The rail will protrude the stile to ensure a better-looking corner joint. This is a built-in manufacturing process and is not considered a defect.

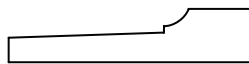

- Elite Bead
- Executive Bead
- D Bead
- R Bead
- 0181 Bead

CONTACT CUSTOMER SERVICE FOR DESIGN PRICE

All products in this section are produced with a single panel up to the size of 26" wide and or 48" high. Any items ordered as 26 1/16" wide and or 48 1/16" high will be produced with multiple panels unless specified otherwise by the customer. Bottom panels will be square panels unless otherwise specified by the customer. Single panel items over 26" wide or 48" high will not be warrantied for any expansion or contraction issues.

DOOR & DRAWER OPTIONS

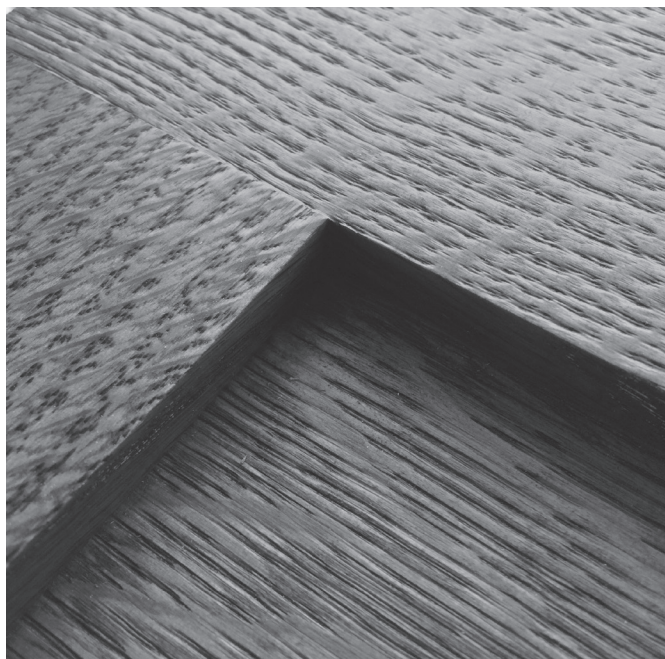

BARNWOOD DOOR

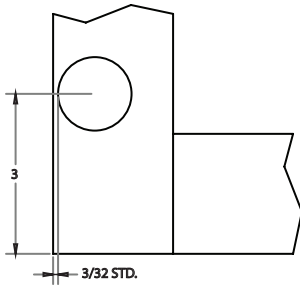

- Our Barnwood Species is made to look like salvaged wood taken from repurposed barns. The aged and weathered barnwood is full of character and charm. The look of this material is popular in the shabby farmhouse designs of today.
- Door design: MRP10
- Species: Red Oak, White Oak, Hard Maple, Cherry
- Bead option: Square
- Panel profile: Flat 3/8" Rev G
- Edge profile: ME
- Barnwood MRP10: contact customer service
- Barnwood MRP10 DF: contact customer service
- Barnwood Slab: contact customer service
- Material charges: Standard material x 1.76%
- Finish available as wipe on/wipe off only – 1.5% of normal cost.

SEASONED GRAIN RELIEF

- **ADDS COST** per panel
- Add 3 days to lead time
- Our Seasoned Grain Relief consists of the removal of the softer portions of the wood's surface from the face of the product which will result in a textured feel and appearance.
- This option on a 5 piece product will only be evident on the flat face surfaces. Beads and edge profiles will not show any relief.
- There will be no finish sanding of any kind done to the face of this product.
- The following designs will be available with our Seasoned Grain Relief: FP-10, FP-0149, FP-1097, FP-12, FP-14 and Slab 400 Line. Solid wood panel options may be available through SPP.
- The following species will be available with our Seasoned Grain Relief: Hickory, Quarter Sawn Red Oak, Quarter Sawn White Oak, Red Oak, White Oak, Rift White Oak, and Rift Red Oak .
- Panel Raise Options: 1/4" MDF core veneer panel, and 3/8" square. Hickory, White Oak, Quarter Sawn Red Oak only available with 1/4" PNLS.
- Bead Options: Square and 30* Chamfer.
- Edge Profile: ME, MER, and M12.
- Product is available with any of our finish options. Meridian Products recommends this product line with a low sheen. This product looks best with lower sheens. Please purchase a sample door to review your request before purchasing a complete job.

POLISH SANDING WITH BROKEN EDGES

- Polish sanding is an option to help decrease your sanding of our Product. Products with any sanding from Meridian Products will still require white wood sanding before you finish. Meridian Products does not sell any items with the expectations of being finish room ready.
- All doors are polish sanded and edge broken on the face standard with all door and drawer purchases.
- Polish sanding option done with the following sanding levels.
 - 2 sets of orbitals to break the edges – 220 Grit Sandpaper
 - 1 Micron 100 = 150 Grit Sandpaper
 - 1 Micron 80 = 180 Grit Sandpaper
- Option pricing for Polish sanding or edge breaking on the back of products or edge.
 - Sand edge by hand: **ADDS COST** per panel
 - Sand back and edge: **ADDS COST** per panel
 - Face sanded twice: **ADDS COST**

GLUED IN MDF PANEL OPTION

ADDS COST Per Panel

This option is only available with a solid wood frame and MDF panel construction. Glue will be added to the panel on all four sides.

MDF FLAT PANEL SAND

Arrives at Meridian Products with a standard 150 sanding on face and back. With this offering, Meridian Products will sand the product to 220 and remove some of the minor 150 grit scratches on the panel before assembly.

- Order with terms: Sand MDF Panel to 220: **additional** per panel

PUTTY PIN HOLES- **additional per panel**

OVERSIZED SLAB OR PANEL

cost is determined per piece

Any slab or panel over 23 3/4" wide

Any slab or panel over 6" wide and 60" long

Slabs over 12" wide are not guaranteed

Doors over 26" W will be made with 2 panels when design allows

Doors over 48" H will be made with 2 panels when design allows

OVERSIZED FRAMING

ADDS COST per piece up to 5 15/16"

ADDS COST per piece over 6"

Customize mortise and tenon doors by altering the framing width from standard dimensions to a larger size. Any product with framing sizes 12" plus will be priced through special designs.

UNDERSIZED FRAMING

ADDS COST per door

Customize mortise and tenon doors or drawers by altering the framing width from standard dimensions to a smaller size.

Minimum framing width is 1 1/4".

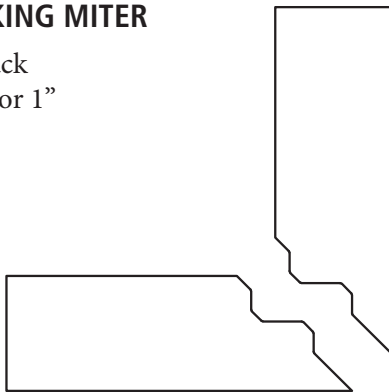

Upon request, doors can be made undersized with std framing for an **ADDS COST** –for **coped** mortise & tenon, as well as for **notched** mortise & tenon.

FRAME ONLY DOORS WITH NO GLASS RABBET

The option charge **ADDS COST** to the design price.

**45 DEGREE LOCKING MITER**

- Specify face or back
- Available in 3/4" or 1"
- **ADDS COST**

**DISTRESSING**

You may customize your order with our standard distressing options #1, #2 or #3. Meridian Products may also meet custom distressing specifications based upon a time and material pricing.

DISTRESSING OPTION #1 DOOR/DRAWER FRONTS

Option Price: **ADDS COST** per door, drawer, or slab

Distressing includes:

- Random dents and small gouge marks.
- Random and uneven easing of edges and corners to simulate natural aging and wear.

DISTRESSING OPTION #2 DOOR/DRAWER FRONTS

Option Price: **ADDS COST** per door, drawer, or slab

Distressing includes:

- Random dents and small gouge marks.
- Random and uneven easing of edges and corners to simulate natural aging and wear.
- Random “relief” cuts in door frame joint to simulate an “open joint”.
- Random “split” cuts simulate “dry out” splits in wood.
- Random clusters of small bird peck or worm holes.

DISTRESSING OPTION #3 DOOR/DRAWER FRONTS

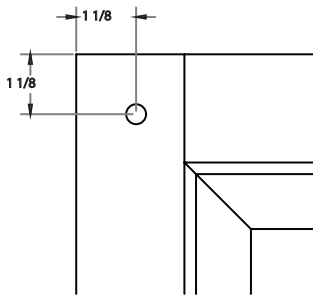

Option Price: **ADDS COST** per door, drawer, and slab.

- Distressing includes:
- Random dents and small gouge marks.
- Random and uneven easing of edges and corners to simulate natural aging and wear.
- Random “relief” cuts in door frame joint to simulate an “open joint”.
- Random “split” cuts simulate “dry out” splits in wood.
- Random clusters of small bird peck or worm holes.
- Rasping: randomly placed marks on the raised profiles to simulate severe wear.
- All around heavy distressing.

CUSTOMER DISTRESSING OPTION

Option price: contact customer service

DIAMOND PANEL ROUT

Option price: **ADDS COST** per panel

Not available in red oak

The diamond panel rout is currently available in the 1/2" C panel raise.

Exterior Doors

Meridian Products offers several door styles and wood species that can be installed for exterior use.

Meridian Products Exterior Doors are only available in 3/4" material. Meridian Products Exterior Doors are perfect for outdoor kitchen cabinet applications.

- **ADDS COST** option charge for exterior doors.
- Expect extended lead times.
- All exterior doors are hand glued and clamped.
- Special lead time is applied to exterior products.
- Finish is unavailable on all exterior products.
- Mullions are not available in any exterior door.

Materials available for exterior door and drawer fronts (call for pricing):

Cambia (Ash, Soft Maple, Poplar, and Red Oak), Iroko, Teak Mahogany, Western Red

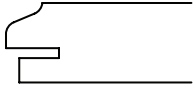

Cambia Species may be the first truly green lumber resource that performs better and costs less than the alternative wood species and substitute products developed to replace wood. The Cambia thermal modification process uses high heat in a controlled atmosphere to improve the durability of the wood as well as to increase its dimensional stability. Natural color in the special drying process that provides a rich finished product that looks exotic without hurting the environment.

Decay Resistant – Cambia thermally-modified wood no longer contains sufficient nutrients to support insect infestation or fungal attack.

Increased Dimensional Stability: Cambia is less susceptible to cupping and warping with changes in relative humidity.

Exterior Door Warranty

- Meridian Products' warranty on the exterior products we offer is exclusive to workmanship only.
- Meridian Products' warranty on the exterior products we offer will not exceed 90 days from the time of confirmation.
- Meridian Products cannot control the environmental conditions our exterior products will be exposed to. Meridian Products will not warranty color changes or any other changes in the woods' natural patina. Cracking and splitting of wood may naturally happen depending on environmental conditions as well. Meridian Products will not warranty any cracking and splitting of any exterior products.
- Meridian Products encourages all of our customers to educate and inform their customers so they understand what can happen when wood is exposed to the outside environment.
- Most door designs available.
- Contact Sales or CSR for details.

APPLIANCE SLOT

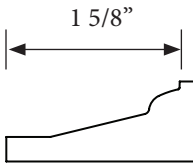

Option Price: **ADDS COST** per door

Slot width is 1/2"

No extra lead time

Available Edges:

R2	H2	OM
AL2	MER	C2

Stain items will be clear-coated on the back.

Finished open louver doors minimum charge 7 square feet.

Add one day lead time to all SCM colors.

THE MERIDIAN PRODUCTS FINISH COLLECTIONS

Aside of our standard stain, paint, and glaze options: Meridian Products offers a variety of specialty finishes.

NATURE INSPIRED COLLECTION

This collection is composed of all painting finishes with exact sanding and glaze. These colors are an homage to the wonder of nature that surrounds us. With earthly and grayish tones.

- Snow Drift
- Fossil Gray
- Smoke

THE ANTIQUE COLLECTION

This collection utilizes a base dye stain along with “rub through” to achieve an antiqued finish. Some finishes in this collection are also exact sanded and glazed to enhance the overall finish.

- Antique Bone

THE ITALIAN COUNTRY COLLECTION

This collection is composed of all painted finishes with exact sanding and glaze.

- Turin
- Veneto

THE PAINT AND GLAZE COLLECTION

This collection consists of our painted finishes with a wipe on wipe off glaze process.

- Biltmore

THE EARLY AMERICAN COLLECTION

This collection uses color tone process with rub through to achieve a custom aged look. The color tone finish can best be described as an opaque stain. Distressing, as an option, can be added to the product enhancing the overall look of the finish. Wood species like Natural Cherry can be ordered with this finish to reveal deeper wood color and tone in the rub through process. Other hardwoods available are Hard White maple and White Birch.

- Jamestown

PAINT/STAIN WITH GLAZE COLOR MATCH FOR VENEER AND SHEET GOODS

The following colors are paint or stain matches for some of our more popular glaze match options. These colors work very well on veneer and sheet goods that need cut or altered, as glaze is very prone to cracking and chipping when cut. These colors will give you the same look without any glaze or glaze hang-up.

Paints:

- Antique Bone – SCM3760
- Biltmore -SCM3761
- Colonial Paint with Van Dyke Glaze – SCM3114
- Colonial Paint with Pewter Glaze – SCM3124
- Fossil Gray - SCM 3758
- Frosty White Paint with Pewter Glaze – SCM3115
- Porcelain Paint with Pewter Glaze SCM3120
- Porcelain Paint with Van Dyke Glaze – SCM3121
- Smoke – SCM3759
- Snowdrift – SCM3757
- Soft White Paint with Pewter Glaze – SCM3123
- Turin – SCM3771
- Veneto – SCM3770

Stain:

- Driftwood with Black Glaze – SCM3138

All pint, quart, and gallon prices are NET prices. 5 day lead time standard or 2 day for rush.

LIQUID FINISHING/PAINTING MATERIALS (HARDENER AND THINNER SOLD SEPARATELY ON REQUEST)

THINNER	NET PRICE			
SLOW THINNER (RETARDER)	NET PRICE			

PRODUCTION PREPARATION AND MIXING RATIOS

		By Volume	By Weight
Hardener	Sealer	Add 50%	Add 50%
	Top Coat	Add 50%	Add 50%
	Primer	Add 50%	Add 30%
	Paint	Add 55%	Add 35%
Thinner	All Coatings	Add 10%-30%	Add 5%-20%

- Do not add thinner before hardener.
- Add hardener to base and stir thoroughly. Agitation must be continuous.
- Add thinner as necessary. Check and record viscosity for repeatable results.
- Thinner added can be either (Regular)Thinner, Slow Thinner, or a blend of the two. This will depend on your shop conditions and what works best for the finisher.
- Once hardener is added to base, "Pot Life" is started. All products have a pot life of 3-4 hours before the coating starts to thicken and is unusable.
- Constantly agitating coating will maximize pot life.
- Training is available from Meridian Products for use of products.

Mixing Examples:		By Volume (Ounces)	By Weight (Grams)
Primer	Base	100oz	100g
	Hardener	Add 50oz	Add 30g
	TOTAL	150oz	130g
	Thinner	Add 15oz (15%)	Add 10g (10%)
	TOTAL	165oz	140g
Paint	Base	100oz	100g
	Hardener	Add 55oz	Add 35g
	Total	155oz	135g
	Thinner	Add 20oz (20%)	Add 20g (20%)
	Total	175oz	155g

Hazardous shipping charges apply to all liquid finish shipments

- **ADDS COST** per common carrier or ground order
- **ADDS COST** per Meridian Products truck order

SPECIAL COLOR MATCH (SCM)

Meridian Products specializes in achieving customer colors to meet your finishing needs. Samples of both options below will be required to guarantee color approval. All colors will be given a color and sheen specific SCM number (Example: SCM 1234) for future ordering purposes. This number will be how Meridian Products recognizes your color.

SCM Process (Customer Supplied Color Sample)

Contact your Customer Service Representative and inform them that you have a custom color need. They will send you an RGA for you to send the color sample to Meridian Products along with a Meridian Products SCM order form. Do not send any samples to Meridian Products without an RGA.

Special color matches are available in paints, stains, and glazed applications.

- You will receive an acceptance form with the sample item. You will need to return that form to Meridian Products with your approval or rejected notice. This form must be received by Meridian Products before any orders can be placed with your new color.
- If rejected Meridian Products may agree that a second attempt could produce a better result. If we believe that a second color match could be better, it will be done at no charge to you the customer. If we feel that the match is acceptable to our standards, a second match will be the responsibility of the customer.
- Meridian Products will only guarantee color match acceptability with products being purchased with the same sheen level as the approved matched.
- Please allow up to 3 weeks for the completion and delivery of your color match request.

All SCM Process color matches will become inactive and invalid if not ordered after one year from the purchase of the last order. We highly recommend that every year you request an updated sample to ensure future orders' accuracy. This will be done free to you if you use the color often. Inactive colors cannot be reactivated- a new color match will need to be produced.

Fan Deck Color Match (Only solid paint colors by paint vendors)

You can request any standard color match by companies like Benjamin Moore & Sherwin Williams to be matched by Meridian Products. When ordering you must specify the official fan deck color name and identification number (Use Meridian Product order form). We may request you to send us your fan deck to ensure accuracy. You may waive the opportunity to receive and approve a paint sample. A disclaimer will need to be signed releasing Meridian Products responsibility if the color does not meet your expectations.

Page 17.16 to 17.19 are colors that have already been matched and approved by a customer. You are welcome to utilize those colors without a color match fee being needed.

Costs of SCM (All Net)

Paint or Stain SCM Process - (Paint will be on MDF Slab & Stain will be on 12 x 15 Door)

Fan Deck color with Sample - (Paint will be on MDF Slab)

Fan Deck color without sample - Paint sample will be produced for Meridian Products only)

Specialized SCM (Glazed, exact sanding, Etc.) - (Sample will be sent on 12 x 15 sample door)

Mixing fee cost - is per order placement for any colors other than Meridian Products standard color options. This includes pre-existing fan deck color options.

****CONTACT CUSTOMER SERVICE FOR PRICING**

All colors listed here have been approved to match the color provided to us by one of our customers. The match was determined by them to be an acceptable match to their fan deck or sample. Meridian Products makes no guarantee that the color will match perfectly to any other fan deck or sample. Meridian Products highly recommends that you receive a sample before placing your full order to ensure it meets your expectations. If the color does not match your expectations you should order your own color match. SCM Colors can not to altered or changed.

Meridian Products Drawer Boxes are Guaranteed for Life

Meridian Products offers a limited lifetime warranty on drawer boxes.

- Warranty is guaranteed to our original customer for the original homeowner.
- Any alterations to a drawer box not by Meridian Products will void warranty.
- Lifetime warranty is for drawer box only and does not include any labor or other supplies.
- Any defect caused by neglect or improper use or installation will void warranty.

Regular Drawer Box Material Specifications

Regular drawer box material will have a uniform color and grain match. Additionally: cracks, checking or shake are not permitted. Mineral streaks will be limited. Stain, vine marks, worm track, tiger stripe and curly grain must blend with surrounding color and grain and should not be a focal point.

- Front and back will be regular grade material on the inside of the box.
- Sides of box will be regular grade material on the outside of the box.
- Select grade face option **ADDS COST** per piece

Drawer box bottom quality will remain Meridian Products standard offering.

DRAWER BOX ASSEMBLY

Assembled & Sanded **ADDS COST** per box

OVERSIZED DRAWER BOXES

Any drawer box oversized in depth and/or width may need additional lead time. Drawer boxes that are over 38" deep and/or 42" wide will receive an **ADDED** option charge. Heights over 15" H are in 1" increments with 18" max.

FINISHING 3 SQ. FT. (SEE PAGE 15.3 OR 15.4)

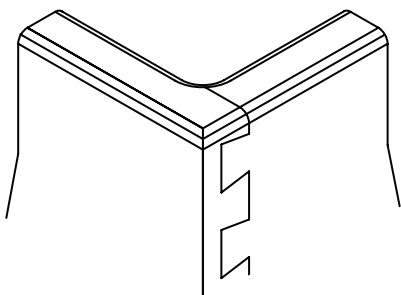

Clear (seal & varnish)

Items over 6 square feet or 865 square inches is 6 sq. ft.

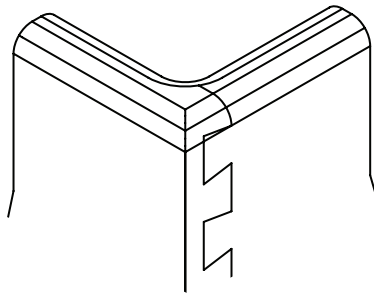

High gloss up charge - **ADDED** option cost

CUSTOM TOP EDGE PROFILE

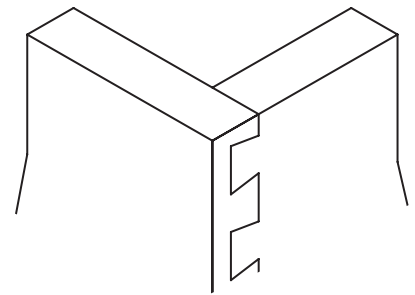

Profiles are shaped after box is assembled leaving no open joints at corners

Custom 1/8" Radius

FLOATING SHELVES

The floating shelves are available with the following options:

- Species options: Cherry, Hard Maple, Paint Grade Hard Maple, Red Oak, and other species may be available through SPP.
- The top and bottom shelf is produced by 3/8" A1 MDF core veneer with matching 3/4" solid wood trim on three sides.
- Standard height or thickness of shelf unit is 2 1/2".
- Shelf standard depth is 10". Shelf max length is 96".
7" minimum depth
12" maximum depth
- Available with paint, primer, stain, and glaze. All finish charges are 1 1/2 X door finish costs.
- Add a decorative edge to the top edge of your shelf. **ADDS COST** for top front and sides of the shelf. Increased **ADDS COST** for both top and bottom.

Support Frame:

- Produced from 3/4" ungraded hardwood species.
- All floating shelves should be mounted to a minimum of two studs for shelves under 50" wide and three or more for over. We recommend high quality coarse thread screws at least 2 1/2" in total length with at least two screws per stud.
- After complete installation, it is recommended that the shelf be secured to the support. Metal support brackets included.

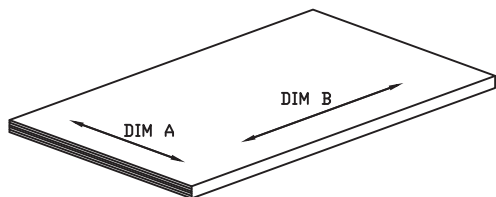

Warranty:

- Meridian Products will not accept responsibility for shelf failure due to inappropriate or inadequate installation practices by the installer. The maximum weight capacity for a floating shelf is 9-10 pounds per lineal foot with proper installation.
- Failing to follow our installation recommendations will void any and all warranties on this product or any damage due to failure.

VENEERS / SHEET GOODS

- Veneers are not guaranteed to match solid wood products. Veneers are sliced from premium material; color and grain match will be more uniform than solid wood items.
- Proper surface conditions and preparations are critical to a successful application and performance of a veneered surface.
- Wood on wood veneers is best applied with roller grade adhesives. Please follow all adhesive instructions on both the veneer and substrate surface. Improper adhesion, surface preparation, and or installation techniques will negatively affect the performance of the veneer and will void any warranty.
- Meridian Products paintable veneer is a grain-free product that is an excellent option for painting. It sands well and cuts.
- The manufacturer recommends, that all veneers should be placed flat and allowed to acclimate for 48hours before installation.
- Meridian Products does not accept any returns of veneer or sheet goods.
- Meridian Products does not cover any warranty claims for veneers shipped on common carrier or ground. If you receive a product damaged, we will file a claim on your behalf and credit you if covered by our third-party delivery company.
- Meridian Products does not warranty any veneer for waves or bubbles associated to a sheet of veneer if finish (by Meridian Products or our customer) unless it is assembled to a substrate at least ¼” thick before finish.
- All pricing is for 4 x8 sheets. All items are available in 2 x8 sheet sizes at half published pricing.

Meridian Products does not recommend doing paint and glaze or stain and glaze on any veneer or plywood type product if you will be altering (cutting, drilling, etc.). Glaze on top of paint or stain in this application is very fragile and cracking, chipping or peeling should be expected. Meridian Products will not warranty veneers or plywood with glaze due to these listed expected results.

VALANCES

- Standard height is 6"
- Please specify when ordering in non-standard heights.
- Available in the following edge profiles for an **ADDED COST** is added
B2, C2, CH2, E2, GR2, H2, PR2, R2, R3, V2
- Custom valances are available on a time & material basis. Customer must supply pattern or design.
- Double design price and edge charge when valance is longer than 48".
- Available in all species - see material price sheet on page. 4.1.
- M4M: **ADDED COST** option charge

ROMAN ARCH

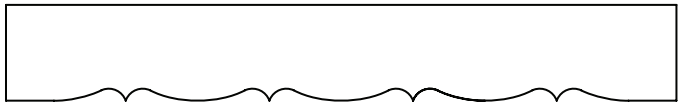

Design Price: **contact customer service**
 Minimum Size: 3" x 10" Specify height when ordering (A)

- M4M edge: **ADDED COST** option charge

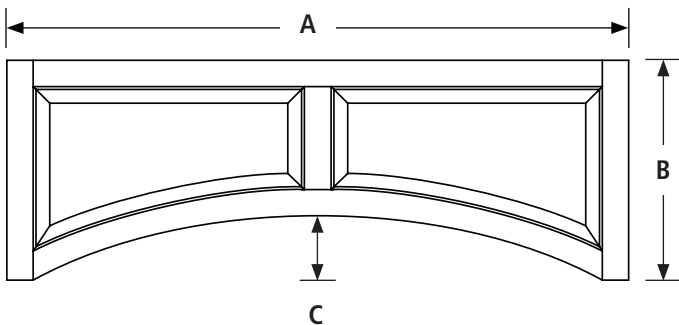

SERPENTINE

Design Price: **contact customer service**
 Minimum Size: 2-1/2" x 17"

SCALLOPED

Design Price: **contact customer service**
 Minimum Size: 2-3/8" x 11-1/4"

RAISED PANEL

Design Cost = Single panel door + materials + additional

Design Cost = Two panel door (shown) + materials + additional

Please use order form to enter the following requirements:

- Overall size (WxH)
- Species
- Lip
- Panel raise
- Frame bead
- Size at "A"
- Size at "B"
- Size at "C"

3" min opening for center style

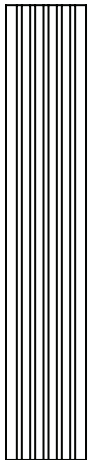

FLUTES

When ordering, please specify the following:

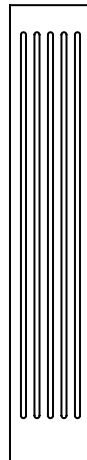

- Width
- Height
- Number of flutes
- Flute width (1/4", 3/8", 1/2", 5/8", or 3/4")
- Distance from edge
- Distance between flutes
- If partial flute, specify distance to start of flute at top and bottom

Double price if flute is longer than 48".

Available in all species - see material price sheet on page 4.1.

**FULL FLUTE**

Design Price: /per flute

**PARTIAL FLUTE**

Design Price: /per flute

TO CALCULATE COSTS:**Material Price**

To calculate material price:

Total square foot of valance or flute x wood species price = material cost (wood species pricing is listed on page 4.1)

Design Price

Design prices are listed on previous page.

For raised panel valance, please fax in your required measurements for a quote.

Total Cost

To calculate total cost add together material price and design price, plus option price, if any.

Material Price + Design Price + Option Price (if any) = Total Cost

Radius products cannot be rushed or expedited without the approval of Meridian Products.
 Regardless of terms, ALL radius orders are quoted before ordering.

Radius Products Pricing and Specifications

All pricing includes material AND design cost.
 Radius products made from select grade material.
 Radius is to center of door thickness unless specified.
 All radius doors over 40" will be priced through special designs.
 All radius rails are produced using solid wood laminated material.
 6 1/2" - 7 15/16" - minimum radius for most radius designs.

DESIGN CHARGE FOR CONVEX OR CONCAVE: 12", 18", 24" RADIUS DOORS AND DRAWER FRONTS (UP TO 40" HIGH)					
DESIGN	SPECIES	HARD MAPLE, WHITE BIRCH	RED OR WHITE OAK	CHERRY	PAINT GRADE

35MM Hinge Bore	cost per door
M4M Edge	cost per door or drawer
Mullions per lite	cost per lite
Non-Standard Framing under 6"	cost per framing
Non-Standard Framing 6" or over	cost per framing
Non-Standard Radius	ADDED COST

Other radius door designs are available.
 Contact your Customer Service Representative for designs and pricing.

DEFINITIONS FOR ORDERING RADIUS PRODUCTS

Radius	Distance from the center of a circle to its edge. Measured in inches. (Meridian measures radius to the center of a door.)
Chord	A straight line between two points on a circle. Measured in inches. (In our order system, the chord is always measured on the face of the cabinet.)
Arc	The curved line between two points on a circle. Measured in inches or degrees.
Bow	The distance from the center of the chord to the arc. Measured in inches.
Concave	The face of the door is toward the inside of the circle.
Convex	The face of the door is toward the outside of the circle.
